

furnace and fugue

PERFORMANCE EDITION

50 fugues from Michael Maier's *Atalanta fugiens*

The image shows a musical score for four voices, each with its name written vertically on the left side of the staves. The voices are:

- Atalanta fugiens.** The top staff, featuring a soprano-like vocal line with a mix of black and white note heads.
- Hippom. sequens.** The second staff from the top, featuring a basso continuo-like line with black note heads.
- Græcia** (with a small 'æ') The third staff from the top, featuring a soprano-like vocal line with black note heads.
- Pomum morans.** The bottom staff, featuring a basso continuo-like line with black note heads.

The lyrics for the first two voices are as follows:

Sy ri a Adonidem habet, Dio-
Ægyptus, qui sunt nil nisi Sol Sophi-
nysum Græcia, Osi rim
æ, nil nisi Sol Sophi æ.

The lyrics for the third and fourth voices are as follows:

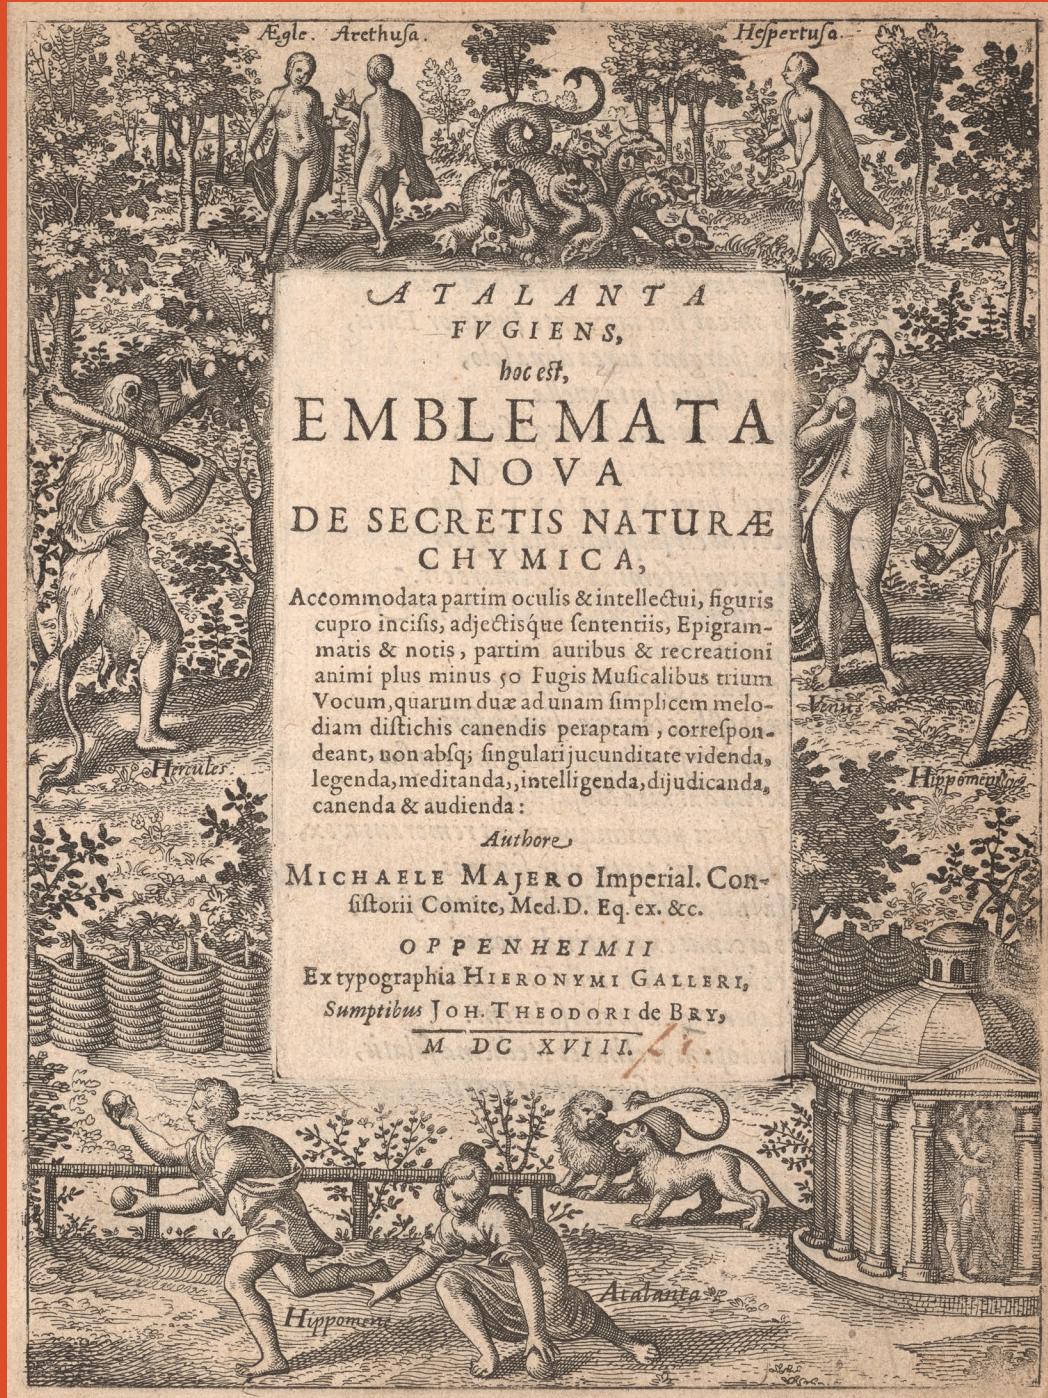

Syria Ad ni dem ha bet Dio ny sum
Ægyptus, qui sunt nil ni si Sol So phi-
Græcia Osi rim
æ nil nisi Sol Sophi æ.

The lyrics for the first two voices are repeated at the bottom of the page:

Sy ri a Adonidem habet, Dio-
Ægyptus, qui sunt nil nisi Sol Sophi-

Supplement to *Furnace and Fugue: A Digital Edition of Michael Maier's Atalanta fugiens (1618) with Scholarly Commentary*

www.furnaceandfugue.org

Furnace and Fugue embodies Michael Maier's multimedia masterpiece in electronic form, and this performance edition is notably the only print component of the project. For musicians wanting to further explore Maier's epigrams, which form the lyrics to the fugues, we invite you to delve into *Furnace and Fugue* at www.furnaceandfugue.org for fully searchable Latin and English texts and translations.

Michael Maier

Atalanta fugiens (1618)

PERFORMANCE EDITION

Critical Commentary

SOURCES

1. Maier: Michael Maier, *Atalanta fugiens, hoc est, emblemata nova de secretis naturae chymica, accommodata partim oculis & intellectui, figuris cupro incisis, adiectisque sententiis, epigrammatis & notis, partim auribus & ...* (Oppenheim, 1617).

It should be noted that there are two states of *Atalanta fugiens*: one dated 1617 and the other dated 1618. These states have been determined to have come from the same setting of type by James R. Voelkel, Curator of Rare Books and Manuscripts at the Othmer Library of Chemical History, and Dr. Donna Bilak. There are two distinguishing features between the states: the date on the title page of the 1618 state is differentiated from its 1617 counterpart by an extra Roman numeral “I”; and only certain copies of the 1618 state have the portrait of Michael Maier on page 11 (no copies of the 1617 state have the portrait, nor do all extant 1618 copies contain Maier’s image, leading Voelkel to surmise that this particular plate was late in reaching the printer). The editors of *Furnace and Fugue* have therefore concluded the 1617 and 1618 copies to be virtually identical states rather than separate editions. The identification of the 1617 state as the primary source for this performance edition should be understood as an indication of which physical copy served as the primary source of the editors and not as an indication of differing sources between this performance edition and *Furnace and Fugue* as a whole.

2. Farmer: John Farmer, *Divers & Sundry Waies of Two Parts in One, to the Number of Fortie upon one Playnsong* (London, 1591).

It was recently discovered by Dr. Loren Ludwig that forty of Maier’s fifty fugues in *Atalanta fugiens* are in fact manipulated copies of John Farmer’s waies. This edition is the first to take Farmer’s *Divers & Sundry Waies* into account as a musical source. Fugues derived from Farmer list both Maier and Farmer as sources, and the relevant individual waie is indicated in the critical commentary.

Maier is the point of departure for this edition. Farmer was consulted throughout for solutions to rhythmic and harmonic problems and canonic inconsistencies in Maier. The critical commentary specifies when an editorial solution was taken from Farmer or was created from a combination of the two sources. When Maier and Farmer disagree on a pitch, Farmer’s pitch is indicated in the critical commentary at Maier’s transposition. It should be noted that Farmer’s waies are un-texted, and Maier made many rhythmic alterations (usually subdivision) to accommodate his texts. These rhythmic differences are not noted in the critical commentary.

PREFATORY STAVES

Maier transposed Farmer’s fugues and also freely manipulated Farmer’s clefs. Prefatory staves represent Maier only; Farmer’s original keys and clefs are not indicated.

ACCIDENTALS

This edition observes the modern rule of barline cancellation of accidentals. Cautionary accidentals are not employed. Maier’s accidentals have been preserved in the score, even when clearly erroneous. Above-stave ficta indicate editorial suggestions, some of which come from Farmer. Ficta disagreements between Maier and Farmer are indicated in the critical commentary.

UNDERLAY

Maier's fugues set only the first of three stanzas of each epigram. Maier's underlay has been preserved as closely as possible in the first stanza of every fugue with small adjustments made in the interest of singability only when they do not undermine the overall correlation of musical phrase to textual unit. Underlay for second and third stanzas is entirely editorial. Rhythmic subdivision of the Pomum voice (and less frequently in Atalanta and Hippomenes voices) to accommodate varying syllable counts (it should be noted that Farmer's plainsongs are notated in semibreves only, and Maier himself introduced rhythmic subdivisions to accommodate his texts). Underlay for Atalanta and Hippomenes voices in second and third verses attempts to mirror the structure of Maier's first stanzas as much as possible, though small adjustments to syllable placement have been made to accommodate different numbers and groupings of syllables and to avoid splitting words over rests unless unavoidable.

SPELLING, CAPITALIZATION AND PUNCTUATION

Spelling, capitalization, punctuation and diacritical marks are original and have been standardized to conform to the prose presentation of the epigrams as they appear on the opposing page of each emblem and in the normalized latin view of each epigram on *Furnace and Fugue*.

MAIER'S ERRATA LIST

In the 1617 printing of *Atalanta fugiens*, Maier included an index of canon types and a list of errata. This errata list notes errors in 19 of the 50 fugues and admits itself to be incomplete. Where an error in the manuscript was corrected in Maier's own errata list, this is indicated in the critical commentary.

ABBREVIATIONS AND ORDER OF PRESENTATION

A = Atalanta

H = Hippomenes

P = Pomum

Note names are given in lower case italic *a*, *b*, *c*, etc. Notes are presented in this order: voice (A, H or P); measure (m1); placement within measure (note 1). Rests and notes within a bar are numbered separately: for example, in a measure containing $\text{--} \downarrow \downarrow$, the final \downarrow is identified as "note 2", though it is the third symbol in the measure.)

Fuga I

H, m2, note 4:

b \natural

Fuga II (Farmer II)

All voices m7–8:	“dictis” in the score; “factis” in the printed epigram.
A m4 note 4:	♩ in Maier.
A m7 last note:	♩ followed by ♩ c in next measure (no dot or tie) in Maier.
H m1 note 4:	a in Maier, corrected to d in Errata.
H m7 note 1:	♯ in Farmer.
H m10 note 3:	♯ in Farmer.
P m2 note 1:	c♯ in Maier.

Fuga III

No notes.

Fuga IV (Farmer XXIII)

A m1 note 2:	♯ in Farmer.
A m9 notes 4–5:	Both ♪ in Maier.
A m10 note 1:	c in Maier.
A m10 note 2:	a in Maier.
H m5 notes 2–3:	Both ♪ in Maier.
H m5 note 4:	b in Farmer.
H m7 notes 1, 4:	♯ in Farmer.

Fuga V

No notes.

Fuga VI (Farmer XXV)

A m2–3:	Maier sets the word “Pingui” to ♩ ♩ ♩, c g♯ c. Errata corrects first ♩ c to ♦ but no mention of g♯. Solution is Farmer’s.
A m8 note 2:	bb in Maier.
H m3 note 1:	d♯ in Maier; given solution is Farmer’s.

Fuga VII

No notes.

Fuga VIII (Farmer XXVII)

P throughout:	No accidentals in Farmer.
---------------	---------------------------

Fuga IX

A m4 note 2:	Errata states note 2 should be ♦. This seems unlikely, as it would require significant adjustment to the surrounding rhythms. If Maier meant to correct note 2 to ♩, this could be accommodated by changing the preceding rest to ♪. This edition retains the original notated rhythms, which cause no problems.
H m4:	Superfluous ♩ a between notes 2 and 3, corrected in Errata.
H m8 note 1:	♩

Fuga X (Farmer XV)

- A m7 note 4: ♯ in Maier; Farmer has no accidentals.
 A m10 note 2: ♯ in Farmer.

Fuga XI

- A m2 note 1: o, corrected to d in Errata.

Fuga XII (Farmer XIV)

- A m1 notes 2-3: b[♯]-f[#] in Maier. No accidentals in Farmer. Because Maier's accidentals match Farmer's later in the fugue, these opening accidentals appear to be a transposition error. Editorial ficta gives Farmer's version.
 A m5 note 2: a in Maier; f in Farmer (corresponds to H).
 H m5 note 2: d in Maier, corrected to d in Errata.
 H m9 note 1: d in Maier, corrected to d in Errata.
 P m5 note 1: b[♯] in Maier.
 P m6 note 1: ♯ in Maier.

Fuga XIII

- H m6 note 3: c

Fuga XIV (Farmer XVIII)

- P m10 last two notes: Both o in Maier.
 A m10 note 2: ♯ in Farmer.

Fuga XV

- P m5 note 2: o

Fuga XVI (Farmer XVII)

This fugue appears to have multiple copying errors from Farmer to Maier as well as multiple typesetting errors in the placement of accidentals before/after the relevant pitch.

- A m1-2: No accidentals in Farmer. If the performer chooses to keep Maier's ♯s, in m2 the second ♯ was probably meant for the preceding f.
 H m2 note 3: b^b in Farmer.
 A m6 note 4: Farmer's ♯ is applied to the preceding note e, cancelling the b from m5. It is possible to sing Maier's ♯, but more likely it was meant to apply to the preceding e as a ♯.
 A m6 note 5: d in Maier.
 H m6: No accidentals in Farmer.
 A m7 note 3: Farmer's ♯ is applied to the preceding note e, cancelling the b from earlier in the measure. It is possible to sing Maier's ♯, but more likely it was meant to apply to the preceding e as a ♯.
 H m7 note 4: b[♯] in Farmer.
 A m10 last note: o

Fuga XVII

- A and H m4: Alternative solution would be to allow Maier's $b\ddot{b}$ s in A notes 5–6, and add an editorial $b\ddot{b}$ in H.
- A m10 note 1: Alternative solution is $f\ddot{f}$; Maier uses the same melodic movement at the final cadence of Fuga I. The given $d\sharp$ is singable but counterintuitive and inconsistent with Maier's soundworld.
- H m10 note 1: \bullet in Maier, seems to be corrected to \dot{d} in Errata, though the description of the problem's location is unclear.

Fuga XVIII (Farmer XI)

- A throughout: Maier's clef is F3 but should be F4, corroborated by Farmer and by Maier himself in labeling Fuga 18 a canon at the 7th.
- A m6 note 2: $\dot{d} \bullet$ (both d) in Maier, perhaps to the change in system.
- H m6 note 2: Maier's custos appears to indicate $e ; f$ in Farmer, which matches A.
- H m10 note 1: Ficta is Farmer's.

Fuga XIX

- A m4 last note: c , corrected to d in Errata.
- A m6 note 2: e , but custos indicates c , corrected to c in Errata.
- A m7 note 2–3: $\bullet c$ followed by $\dot{d} d$, corrected to $\dot{d} d - \bullet c$ in Errata.
- H m7 note 1: g , corrected to e in Errata.
- P m10–11 last three notes: All $b\ddot{b}$ s.

Fuga XX (Farmer XX)

- H m10 note 1: \sharp in Farmer.

Fuga XXI (Farmer I)

- A m2 note 2: e in Maier; Farmer's version is given.
- H m2 notes 1, 3: Both \sharp in Maier. Both are also \sharp in Farmer, but Maier seems to have copied the accidentals without accounting for transposition.
- H m3 note 1: \dot{d} in Maier, $\bullet d$ in Farmer which matches A.
- H m5–6: Editorial $b\ddot{b}$ s are suggested by Farmer's key signature as well as accurate imitation of A. Similar $b\ddot{b}$ s could be justified in H m3–4, but these work less well.

Fuga XXII (Farmer III)

- A m10–11: $b\ddot{b}$ s in Farmer.
- H m4 note 3: Editorial $b\ddot{b}$ implied in Maier and specified in Farmer.
- H m7 note 1: \bullet in Maier, corrected to \dot{d} in Errata.
- H m5 note 4: \flat in Farmer.
- H m2 note 2: \flat in Farmer.
- H m5 note 4: \flat in Farmer.

Fuga XXIII (Farmer IV)

- A m2 notes 4–5: \sharp is placed to apply to note 5 in Maier; applied to note 4 in Farmer.
- A m4 notes 4–5: Maier corrects in Errata, but they are already correct.
- H m2 note 1: e in Maier, corrected to c in Errata.
- H m5 note 6: b in Farmer.
- H m6 note 2: $d\ d$ (no dot) in Maier.

Fuga XXIV (Farmer V)

- A m4 note 3: e in Maier, g in Farmer. Maier corrects e to g in Errata, though the correction itself has an error, referring to the identical spot in H instead of A.

Fuga XXV (Farmer VI)

- P m3 note 2: $d\ d$ in Maier, resulting in one more note than syllable by m6 note 2. Because Maier has so consistently notated P m5–6 in other fugues as $\bullet\ d\ d\ d\ d\ \bullet$, here m3 has been altered in order to preserve the pattern of m5–6 instead of the other way around.
- A m10 note 6: Final long occurs here in Farmer.
- A m10: All f s are $f\sharp$ in Farmer.
- H m6 note 2: $d\ d$ in Maier.
- H m7 note 3: Missing in Maier. Errata incorrectly states the previous b^{\natural} should be d , not a .
- H m10 H: All bs are $b^{\natural}s$ in Farmer.
- H m11: Extra $\bullet\ c$ proceeds the long in Maier.

Fuga XXVI (Farmer VII)

- A m11: f in Maier, e in Farmer.
- H m3 note 3: d in Maier, corrected to d . in Errata.

Fuga XXVII (Farmer VIII)

- A m10 note 3: \sharp in Farmer.
- H m1: \square followed by $-$ in Maier, corrected to $- -$ in Errata.

Fuga XXIX (Farmer IX)

- A m4 note 2: c in Maier, e in Farmer (corresponds to H).

Fuga XXIX (Farmer X)

- A m6 note 3: g in Maier, corrected to f in Errata; e in Farmer (which corresponds to H).
- H m4 note 3: Missing \bullet in Maier, corrected in Errata.
- H m8 note 2: \bullet in Maier.

Fuga XXX (Farmer XII)

Note on the underlay: Maier's approach to the underlay for H is unusual. Typically, Maier keeps the imitation exact until the last phrase or two, at which point he moves some of H's syllables back or subdivides the penultimate beat in order to accommodate the remaining syllables. Here, Maier (or his printer) broke the imitation after the very first phrase, which is disconcerting for the performer. This edition maintains text imitation through m 10, subdividing the penultimate beat in Maier's usual manner.

- | | |
|------------------|--|
| A m3 note 4: | <i>d</i> in Maier, corrected to <i>f</i> in errata, which agrees with Farmer. |
| A m4 note 5: | <i>♪</i> in Maier; in the Errata, Maier seems to try to insert a dot after note 4, but he mis-identifies the note. Farmer's version is dotted. |
| H m7 note 1: | <i>♩</i> in Farmer. |
| H m10–11: | <i>b♩</i> in Farmer. |
| P m5 note 3: | <i>o</i> in Maier. |
| P m9 notes 2, 3: | Both <i>g</i> in Maier. |

Fuga XXXI (Farmer XVI)

- | | |
|----------------|---|
| A first stave: | Printed with a G3 clef. Key signature suggests G2, and second stave is G2. |
| A m3 note 1: | Missing in Maier, present in Farmer. |
| H m10 note 2: | Maier subdivides into <i>♪ ♪</i> , but there is no textual need for this alteration of Farmer's rhythm. |

Fuga XXXII (Farmer XXII)

- | | |
|-------|--|
| A m8: | <i>—</i> in Maier, <i>—</i> in Farmer. |
|-------|--|

Fuga XXXIII (Farmer XXIV)

- | | |
|--------------------------|----------------------------------|
| P m5 note 1 – m6 note 2: | Printed one whole tone too high. |
|--------------------------|----------------------------------|

Fuga XXXIV (Farmer XXVI)

No notes.

Fuga XXXV (Farmer XXVIII)

- | | |
|-------------------|--|
| A m2 A notes 4–7: | <i>♪♪♪♪ g-g-a-g</i> in Maier; <i>♪♪♪ g-bb-g</i> in Farmer. Solution is Farmer's rhythm and pitches, subdividing final <i>♪ g</i> to accommodate the syllables of "Durumque" (this is Maier's own solution in H). |
| A m4 note 3: | <i>e</i> in Maier, <i>f</i> in Farmer. |
| H m4 note 1: | <i>bb</i> in Maier, <i>g</i> in Farmer (which matches A). |
| P m3 notes 2–3: | Both <i>a</i> in Maier. |

Fuga XXXVI (Farmer XXIX)

- | | |
|---------------|--|
| A m5 note 2: | <i>e</i> in Maier, <i>c</i> in Farmer (which matches H). |
| H m6 note 1: | <i>o.</i> in Maier. |
| H m9 note 4: | Missing in Maier, present in Farmer. |
| H m10 note 8: | <i>o</i> in Maier. |

Fuga XXXVII (Farmer Waie XXX)

- A throughout: A is notated with an F4 clef in Maier, but a starting pitch of *e*. Key signature (one \flat) placement and fugue type imply F3 clef, starting pitch *g*.
- A m3 note 2: *e* in Maier, *f* in Farmer (which matches H).
- A m4 notes 2, 3: *b \flat -a* in Maier, *a-g* in Farmer (which matches H).
- A m10: *d-g* in Maier, *d* long in Farmer with no movement to *g*.

Fuga XXXVIII (Farmer XXXI)

- A m10 note 6: \bullet in Maier.
- H m10 note 3: Missing in Maier.
- H m10 note 6: \bullet in Maier.

Fuga XXXIX (Farmer XXXII)

- A m5 note 4: *g* in Maier, *e* in Farmer (which matches H).
- A m6 note 2: *a* in Maier, *c* in Farmer (which matches H).
- H m10–11 final two notes: *cs* in Maier, *es* in Farmer.

Fuga XL (Farmer XXXIII)

- H: $b\flat$ key signature symbol is incorrectly placed for a C4 clef.

Fuga XLI (Farmer XXI)

Maier gives no special instructions for this fugue apart from identifying the presence of retrograde in the title. The pitches of P are notated normally, but the text is printed in reverse, indicating that the singer should begin at the end and proceed backward. Farmer's instruction reads "The plainsong beneath beginning at the end, and so forward."

- A m9: \downarrow in Maier, $\overline{\text{—}}$ in Farmer.
- A m10–11: Ficta is Farmer's.
- H m7 notes 3–4: *e-d* in Maier, *f-e* in Farmer which matches A.

Fuga XLII (Farmer XIXa)

- A, H, P: Both Maier and Farmer notate m1–5 only, with final note of m5 notated as a long. Maier's text continues on a second line beneath the same music. This edition assumes the longs were not meant to be counted literally and changes the final note value of m5 to \downarrow to maintain the symmetry of bar length leading into an immediate repeat. Another solution would be to end each half-stanza with a fermata.
- H m3/8 note 3: Missing in Maier, present in Farmer. Underlay has been adjusted to accommodate the additional note.

Fuga XLIII (Farmer XIXb)

Note on the underlay: Maier's choice of which text to repeat is inconsistent across the fugue: the first time through he repeats "consistit vertice vulture" in A and H but repeats only "vertice vulture" in P, and in the second time through he repeats "Assidue clamans" in all three voices as shown. Because this latter pattern is consistent across all three voices and better coordinates with the rests in A and H, this edition uses the same repetition pattern in the first half of the fugue.

A, H, P, m10:	Fermatas are Farmer's.
A m2/7 note 2:	c in Maier, b♭ in Farmer (which matches H).
A m3 and 8 note 1:	e in Maier, g in Farmer (which matches H).
H m5 and 10:	This solution is a combination of Maier and Farmer. In Farmer, H ends on the ♦ b♯ with a fermata. Maier adds a ♦ c, no fermata. Maier's additional ♦ is needed for the final syllable of text and rhythmically allows the canon to continue seamlessly from m5 into m6; however, the c in H clashes with A and P when the canon repeats at m6 and creates an odd cadence in m10 after the f♯ in A. Because such pitch-copying errors are so common in Maier's work, this edition uses Maier's rhythmic addition for the sake of the text but retains Farmer's b♯.

Fuga XLIV (Farmer XIII)

H time signatures:	3 in Maier, re-printed every measure's worth of music; tempus imperfectum maior in Farmer. This edition notates H in triplets to reflect Maier.
H m1 last note:	c (below) in Maier.
H m9 last note:	While it can usually be assumed that the earlier accidental no longer applies, in this case both Farmer and Maier specify e♯ two notes later, implying this note is still e♭.
P m4 note 3 – m5 note 3:	This passage is a whole tone lower in Maier.

Fuga XLV (Farmer XXXV)

Atalanta's text is printed upside down, with the instruction "Verte bassum, & incipit ab initio in clavi d."

A clef:	C3 clef in Maier, but pitches and key signature only work if read as an F3.
---------	---

Fuga XLVI (Farmer XXXVIII)

Maier notates only half the music for each voice and gives instructions to the singer to reverse the melody when they reach the end. H's music is printed backwards. Instructions above A: "Prima vox incipiat ab initio." Instructions about H: "Secunda à fine, & canat versus initium." Farmer notates his plainsong as Maier does. The fuguing voices are notated as a single part, with instructions for one musician to start at the beginning and the other at the end. The melody is notated in full; the players do not need to reverse their own lines.

Fuga XLVII (Farmer XXXIX)

Note on Pomum: Farmer's instruction reads: "2 parts in one in the eight, the basse beginning with Tripla to the sembreffe, the other note for note with y plainsong, the plainsong, beginning at the 11. Note and so forward to the end, and then come backward to the 10. note, and so backward to the beginning." Maier's instruction for P reads "Incipe in nota 11 et retrogredere." The full chant melody is notated, but if Maier's instructions are followed, only the second half the chant actually gets sung, forward and backward, and some problematic dissonances occur. Maier seems to have missed the bit about going back to note 10 of the chant before beginning the retrograde. By following Farmer's instruction, P is sung in full and problematic dissonances avoided.

Note on H and P rhythm: in Farmer, both H and P are notated in equal ♩ throughout. Maier's notation of unequal rhythms may be a misunderstanding of Farmer's rhythmic instruction, or a choice to serve the cadence of the Latin text. Though Maier's rhythms cause some passing dissonances in A, the overall harmonic structure still works. It should be noted that in the retrograde portion of the chant, if one follows Maier's rhythm exactly, the pattern shifts from ♩ ♪ ♩ ♪ to ♪ ♩ ♪ ♩, and this creates more problematic dissonances. This edition keeps Maier's unequal rhythms, but does not reverse his rhythmic pattern during the chant retrograde, allowing P and H remain parallel throughout as they do in Farmer.

A m7 last note:	♩. in Maier.
A m10 notes 3, 5	both ♩ in Maier.
A m11:	editorial ficta corresponds to Farmer.
P m5 note 1:	c in Maier; should be a.

Fuga XLVIII (Farmer XXXVI)

Note on the inversion of P: P is notated normally, beginning on *d* as per usual. The text is printed upside down. Maier's instruction for the Pomum is "Verte hanc vocem, et incipe a principio in clave d. ad finem." Farmer's instruction is "You must turne the plainsong upside downward, and then sing forward to the ende" with no hints about what pitch to start on. However, if the inversion is performed using *d* as the line of reflection, extremely problematic dissonances occur. The only solution that avoids such dissonances seems to be to begin the inverted Pomum on *a*. The only possible written clue for this is Maier's title "Fuga XLVIII in 5. Seu 12.", in which the "12" could refer to the interval between the first note of A (*a*) and the first note of P (*a*, 1.5 octaves higher).

Note on the text for H: Maier provides the complete underlay of the couplet for H, but in order for H to sing the entire text, A and P would have to sing their complete couplet twice. Performers must choose whether to repeat A's and P's text in order to let H finish, or to proceed to the next couplet with H behind in the race, as it were.

Fuga XLIX (Farmer XXXVII)

Maier's instructions for the fugue as a whole read: "Vertendo Basin se fugientem vocem et incipiendo ab initio in d sic vertendo simplicem et incipiendo in fine g." Maier's instructions for A read: "Verte hanc vocem, et incipe ab initio d." Maier's instructions for P read: "Incipe a fine, et verte hanc vocem in g, descendendo in a." Farmer gives just one instruction for all voices: "If you would know how to sing this, you must turne the plainsong upside downward, and begin backward and so to the end, and sing it with a b. cliffe eight notes lower then it standes, the other 2 as they be prickt, then shall you agree, though somewhat hard, because of hardnesse."

Maier's instructions are perplexing. This fugue is the only one amongst those copied from Farmer which Maier did not transpose nor make any clef adjustments for any of the voices. Farmer gives no instructions to invert or retrograde either A or H, which are already a mirror of each other at the 5th. If the singer follows Maier's instructions and invert A., H. and A. no longer work together. Furthermore, while Maier didn't transpose A or H, he did transpose Farmer's notation of P, to begin on *d* as usual. Farmer's chant is notated beginning on *a* in a C2 clef. If the singer follows Farmer's instruction to invert and retrograde the chant in Farmer's notated key, beginning on *d*, the fugue works. If the singer follows Maier's instruction and inverts and retrogrades the chant in Maier's notated key, beginning on *g*, the result doesn't work with A and P as notated, nor does it work with Maier's inverted version of A. It is possible that Maier's instructions contain typesetting errors; it is also possible that Maier misunderstood Farmer's instructions, or was simply unclear in his explanation of how to manipulate his transposition of the chant to result in the pitch Farmer notated (it is faintly possible that by "descendendo in a"

Maier meant that the singer should read the chant as though it had descended from an initial *a*, which would have made the final note a *d*, the correct starting pitch for the retrograde inversion). In any case, the version given here is Farmer's singable version.

A m10 A notes 3, 4:	Partially obscured by a tear in the paper; pitch confirmed by Farmer and rhythm inferred by the text.
A m6 note 1:	There is an additional $\downarrow a$ before this note in Maier.
H m2 note 2:	\bullet in Maier.
H m6 note 5:	$b\ddot{h}s$ in both Maier and Farmer.
H m10 note 1:	Ficta is Farmer's.
P octave:	If Maier had followed Farmer's instructions fully, the result would have been sung one octave lower.

Note on $b\ddot{h}s$: These dissonances are surprising inasmuch as they are not required for the sake of correct canonic imitation. However most of this ficta appears in both Maier and Farmer, and Farmer seems to imply intentionality in his comment about "hardnesse."

Fuga L (Farmer XXXIV)

A m4:	--- rest in Maier, -- in Farmer.
H m8 note 2:	\downarrow in Maier, \bullet in Farmer. This rhythmic alteration is presumably for the sake of text, but is unnecessary in verse 1, so H's rhythm and underlay have been adjusted to match A. In verse 3, Maier's rhythmic alteration is used.
P m9 notes 3, 4;	--- in Farmer.

Texts and Translations

Fully searchable Latin and English texts and translations of Maier's epigrams can be accessed in *Furnace and Fugue* at www.furnaceandfugue.org.
